# AMINTA RUNGRUANG

## Computer Science Student

aminta.rungruang@gmail.com

065-652-6330

Phetchaburi, Thailand

github.com/amintarungruang

## PROFILE

Computer Science undergraduate with hands-on experience in web and mobile application development, backend technologies, and database management through academic projects and practical work. Currently exploring opportunities in Web Development, Backend Development, Data, and Software Development. Eager to apply existing technical knowledge, learn from experienced professionals, and contribute to real-world projects while continuously developing new skills.

## EDUCATION

**Bachelor of Science in Computer Science**
Phetchaburi Rajabhat University
**Expected Graduation: 2027**

## TECHNICAL SKILLS

**Programming Languages**
JavaScript · TypeScript · PHP · Kotlin · Python · SQL · HTML/CSS

**Web & Backend**
Node.js · Bootstrap · Supabase

**Databases**
MySQL · PostgreSQL

**Tools & Platforms**
Git · GitHub · VS Code · Android Studio · XAMPP · Godot

## SOFT SKILLS

Problem Solving — Teamwork

Communication — Continuous Learning

## LANGUAGES

Thai — Native
English — Conversational

## PROJECTS

**Phetchaburi Thai Woodwork — Web Application**
*TypeScript · Web Development · Database*

• Developed a web-based customer service and management system for a traditional Thai woodwork business.
• Implemented portfolio management, interactive map, work scheduling, chatbot FAQ, and an administrative dashboard.

**Camping Gear Store — Web Application**
*PHP · Web Development · Database*

• Developed an e-commerce web application with product browsing, ordering, and user account management.
• Implemented automated payment slip verification, password recovery, and an admin management system.

**NeoCoare AI — AI-Assisted Diabetic Neuropathy Screening Application**
*Dart · Flutter · Firebase · Roboflow API*

• Developed a cross-platform mobile application using Flutter for diabetic peripheral neuropathy screening, designed to support early screening by healthcare volunteers.
• Integrated computer vision models via Roboflow API to provide real-time camera overlays for foot detection, sensory testing guidance, and wound analysis.
• Built a Firebase backend using Firestore, Authentication, and Storage to support multi-role user management. Implemented automated PDF report generation and Google Maps integration.

## EXPERIENCE & ACHIEVEMENTS

**Web Development Support — Earn While Learn**
• Assisted with website development, content updates, UI improvements, and basic troubleshooting for assigned university projects.
• Gained practical experience working with real-world requirements and development tasks.

**National Software Contest 2026 (NSC) — Final Round**
AI-Assisted Diabetic Neuropathy Screening Application for Home Use
• Developed and presented an AI-assisted application for diabetic peripheral neuropathy screening.
• Received an Honorable Mention Award in the final round.

**PCNK Games 2025 — Website Development Competition**
• Participated in the website development competition at PCNK Games 2025.
• Collaborated with team members to develop a website within a limited competition timeframe.

## INTERNSHIP AVAILABILITY

Available for an internship from November 2026 to March 2027
